Dark Web Monitor (DWM)

"DARK WEB MONITOR'S INNOVATIVE TECHNOLOGY ENABLES US TO TAKE NEW TECHNOLOGICAL APPROACHES TO SHED MORE LIGHT ON THE DARK WEB AND TO FIND PERPETRATORS."

- MR EISENREICH, BAVARIAN STATE MINISTER OF JUSTICE *

* https://dwm.pm/pilot

DWM is an Open Source Intelligence (OSINT) repository that offers insights into criminal and fraudulent activities happening nowadays and in the past by exploiting dark web and virtual assets. It is an intuitive platform that facilitates users efficiently.

Encrypted darknets, like Tor or I2P, have become a safe haven for criminals who exploit technical anonymity. Their criminal activities range from child abuse and drugs trafficking to large scale financial crimes, affecting both the cyberspace and physical world. Consequently, with these opportunist actions becoming more sophisticated, there is a prevalent need to improve Dark Web monitoring capabilities to gain an edge over these criminals. DWM supports financial institutes, law enforcement agencies and cybersecurity agencies where questionable activities are taking place allowing them to zero in on this information using advanced analytics to trace and apprehend the criminals for prosecution and disruption.

Subscription Plans

Four subscription plans have been devised with Dark Web Monitor. From basic plan with several advanced features to the Alliance plan. This plan provides maximum flexibility on data and software code access, priority setting on new features and day-to-day interactions. These plans are tailored for different purposes to match your organisation's needs.

/Basic   /Business   /Premium   /Alliance

Contents

GENERAL FEATURES

Dark Web Monitor provides access to a substantial dataset collected from the Dark Web, which is indexed and made searchable. It includes access to specialised overviews like Dark Markets, Forums and Mixing Services.

BASIC PLAN

This plan provides advanced analytics and features on top of previous plan. This is meant for a single account that can only be used by one end-user.
/Basic

Advantages

1 Straightforward insights into all domains with different darknets as Tor, I2P, ZeroNet, etc.

2 Advanced analytics in our dashboard based on discovered entities as cryptocurrency addresses, email addresses and PGP keys.

3 Download a full dataset of specific domain, adjust crawling schedule for specific operations, use share credentials for dark markets and mark entities as favourites.

BUSINESS PLAN + BASIC FEATURES

This subscription grants access to all potential users in your organisation. All employees with an active company email address can get access to Dark Web Monitor with this plan. For this plan, the organisation is able to appoint a trusted contact who governs the other users within the organisation by approval.

/Business

Advantages

1 Unlimited number of accounts for your organisation (fair-use policy)

2 Superuser to govern organisation's users

3 Possibility for specialised accounts for example for child sexual abuse investigations

PREMIUM PLAN + BUSINESS FEATURES

This plan extends with active support and interaction for new features. A significant feature is access to the Application Programming Interface (API) for integration of DWM in new or legacy systems of the organisation. This subscription includes a co-creation approach where based on regular meetings priorities and updates are shared.

/Premium

Advantages:

1 Access to the Application Programming Interface (API)

2 Direct point of contact for questions and ideas

3 Participation in co-creation sessions

ALLIANCE PLAN + PREMIUM FEATURES

Alliance partners are the trust foundation of Dark Web Monitor in providing guidance, set priorities, and insights into the full operations of DWM including source code for forensic assurance. These address high level commitments to the solution. In this approach, we develop a customized plan to drive the solutions on the organisation's requirements.

/Alliance

Advantages:

1 Priority setting to keep features aligned with latest Dark Web developments

2 Access to source code for forensic assurance and possibility to deploy own instance

3 Core of Dark Web Monitor support

Code of Conduct

Dark Web Monitor is important tool for security investigations, hence a series of approaches is observed to comply with privacy and security policies of our end users. The DWM approach is described in our Code of Conduct, that can be downloaded from the catalogue.
Summary

| Subscription Plan	Basic	Business	Premium	Alliance
Basic Analytics	√	√	√	√
Advanced Analytics	√	√	√	√
Unlimited accounts		√	√	√
Co-creation + API			√	√
Source code access				√
Alliance support				√
