

CFLW Live

Unique Partnerships for a Safer Cyberspace

12 June 2025

HSD Campus, The Hague

Teams Webinar, Hybrid Event

14:00 – 17:00 CEST

**Partners in Crime
-
Together against
Cybercrime**

CFLW Live is our annual flagship event where we share operational successes, technological innovations, and strategic discussions on enhancements towards a stronger digital ecosystem, with a specific focus on the contribution of law enforcement.

Context

Since CFLW Live 2024, the world has changed tremendously. Cybercrime has evolved and we are more aware than ever of how dependent we are on digital technologies. Together with our partners and community, we strive to bend the curve in a positive direction.

Invitation

At CFLW Live 2025, we bring together a unique range of technologies, scientific state-of-the-art and networking platforms, all pursuing the same mission: a safer cyberspace by combatting cybercrime. You are cordially invited to participate in our annual event.

This year, CFLW Live will be a hybrid event, making it even easier for our entire community to join and participate. We're excited to offer this flexible format while the HSD building undergoes renovations, making it difficult to manage a large community.
